

Intuit QuickBooks™ Enterprise® 2013

Cbeyond Cloud Certification

Your business relies on critical applications every day. If they work properly, it's business as usual. If they don't, your operations are at a standstill. That's why Cbeyond pioneered a certification process to test your business applications and guarantee their performance over our secure, managed network and cloud data center. Cbeyond manages your servers, so you can manage your business.

Cbeyond has certified that Intuit QuickBooks Enterprise integrates with Cbeyond's cloud and network platform. This certification represents successful product deployment, operational testing, performance testing, load testing and impairment testing over a wide range of customer network access technologies.

Our certification program helps take the complexity out of everyday IT. We are responsible for daily management of the server, operating system and backups. That frees up your staff to manage other priorities. When you have a Cbeyond cloud-certified application, you can confidently get on with your business and leave the technology to us.

Enterprise Class Servers

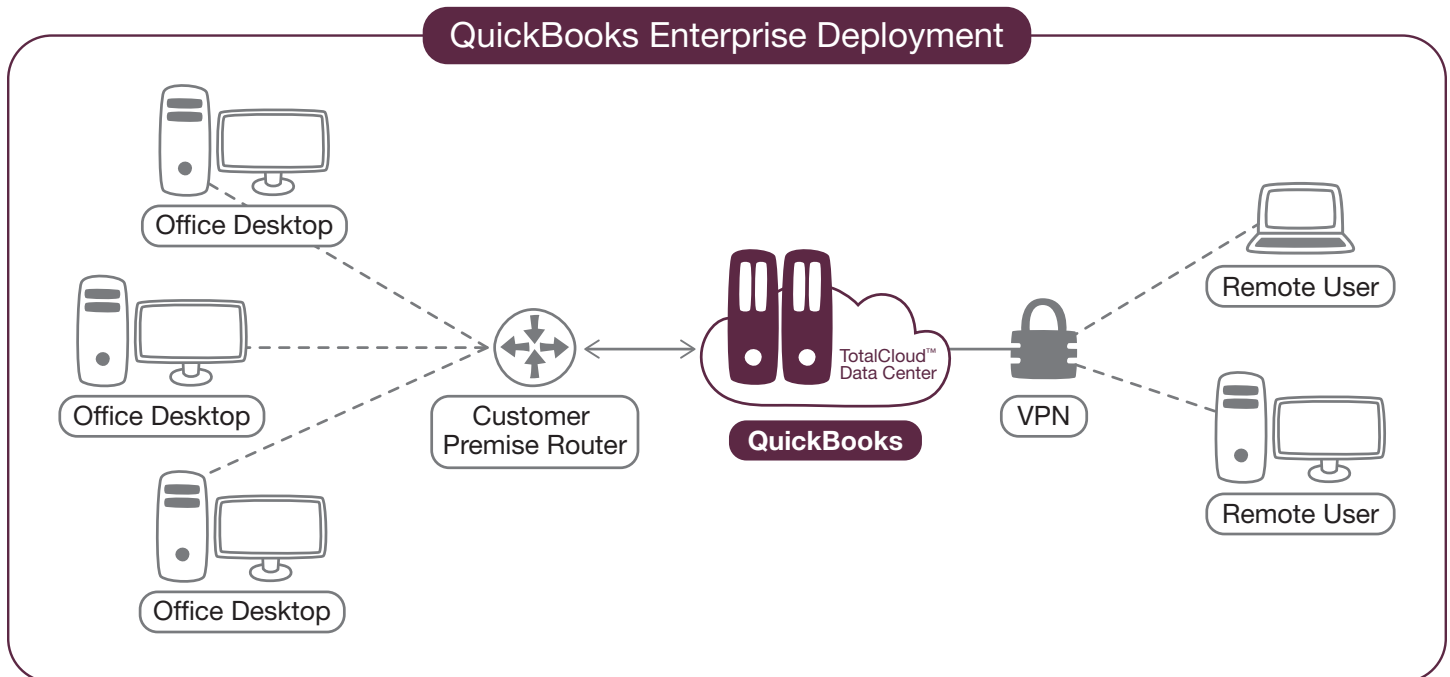

Cbeyond is a certified Microsoft® Gold Provider™. We're the only company to win back-to-back **Microsoft Hosting Partner of the Year** awards for our innovation in cloud computing. Our Cloud servers are instantly scalable on demand and proactively managed by certified engineers to ensure optimal performance of the server infrastructure to support your critical business applications.

Security

Your server is housed in our cloud data center, which operates with the SOC 3 seal of assurance. Your application is protected by encrypted communications and managed firewalls. Your data is continually scanned by Symantec™ anti-virus software and backed up four times daily.

Business Continuity and 24x7 Availability

With 100% guaranteed uptime, Cbeyond ensures your critical business application remains available to you in the event of potential local disasters such as fire, flood, theft, or inclement weather. QuickBooks Enterprise can be accessed with an Internet connection from any location at any time, 24x7, whether on-premise or off-site.

Deployment Recommendations

Cloud servers supporting QuickBooks Enterprise are deployed with the following recommendations:

Server Operating System: Windows 2008 R2 64 Bit

Simultaneous Users	Cloud Server Computing Bundle	TotalCloud Data Center Private	TotalCloud Data Center Public
1-2 Users	2 vCPU Processor 2GB RAM	<ul style="list-style-type: none"> Private Network Firewall w/ VPN Termination 500 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$288.40*</p>	<ul style="list-style-type: none"> Instance Based Firewall w/ SSL VPN 100 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$163.40*</p>
3-5 Users	2 vCPU Processor 4GB RAM	<ul style="list-style-type: none"> Private Network Firewall w/ VPN Termination 500 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$373.40*</p>	<ul style="list-style-type: none"> Instance Based Firewall w/ SSL VPN 100 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$248.40*</p>
6-10 Users	4 vCPU Processor 4GB RAM	<ul style="list-style-type: none"> Private Network Firewall w/ VPN Termination 500 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$408.40*</p>	<ul style="list-style-type: none"> Instance Based Firewall w/ SSL VPN 100 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$283.40*</p>
11-20 Users	4 vCPU Processor 6GB RAM	<ul style="list-style-type: none"> Private Network Firewall w/ VPN Termination 500 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$528.40*</p>	<ul style="list-style-type: none"> Instance Based Firewall w/ SSL VPN 100 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$403.40*</p>
21-30 Users	8 vCPU Processor 16GB RAM	<ul style="list-style-type: none"> Private Network Firewall w/ VPN Termination 500 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$868.40*</p>	<ul style="list-style-type: none"> Instance Based Firewall w/ SSL VPN 100 GB Fiber Channel SAN Storage 7-day data backup <p>Starting at \$743.40*</p>

Microsoft Office Standard 2010 can be added to any Certified Application Server for a monthly fee of \$15/user

*Assumes no additional upgrades and a 3-year contract

Customer On-Premises Requirements and Considerations

Desktop Operating Systems Supported:

- Windows 8 (preferred)
- Windows 7 (preferred)
- Windows XP SP2 or later
- Windows Vista SP2 or later
- OSX 10.6.8 or later

Remote Desktop Client:

Remote Desktop Protocol 6.1 deployed with Cbeyond's recommended RDP configuration

Application Deployment:

Application is deployed on C: drive.
Backups are configured on M: drive

Bandwidth Considerations:

100Kbps of bandwidth is utilized per active user session

Cbeyond guarantees the performance of the server and network infrastructure. We do not, however, guarantee any third party applications, installed by Cbeyond or otherwise. If application issues occur please contact the support staff of the specific software in question.
