

Microsoft Windows® Cloud Experts

Overview

If your business runs on Microsoft Windows, Cbeyond can help you easily transition to the cloud. We are a Microsoft Gold Certified Provider and the only company to win back-to-back Microsoft Hosting Partner of the Year awards.

Our secure cloud data center is built on the Windows stack. Because it's the technology your staff already knows, they don't need to learn a new skill set. You retain complete control of the server and data while we keep the infrastructure running smoothly in the background.

Fully Managed Servers

- 100% network uptime SLA
- 24x7x365 onshore phone and email support
- Network and server monitoring
